

ekopallkragen

-THE LIGHTER OPTION

ekopallkragen IS ENVIRONMENTALLY FRIENDLY

Both cardboard and plastic are burnable and approved to be burned. The traditional wooden pallet collar has nailed hinges that are hard to remove, and the galvanised metal can not be burned eco-friendly.

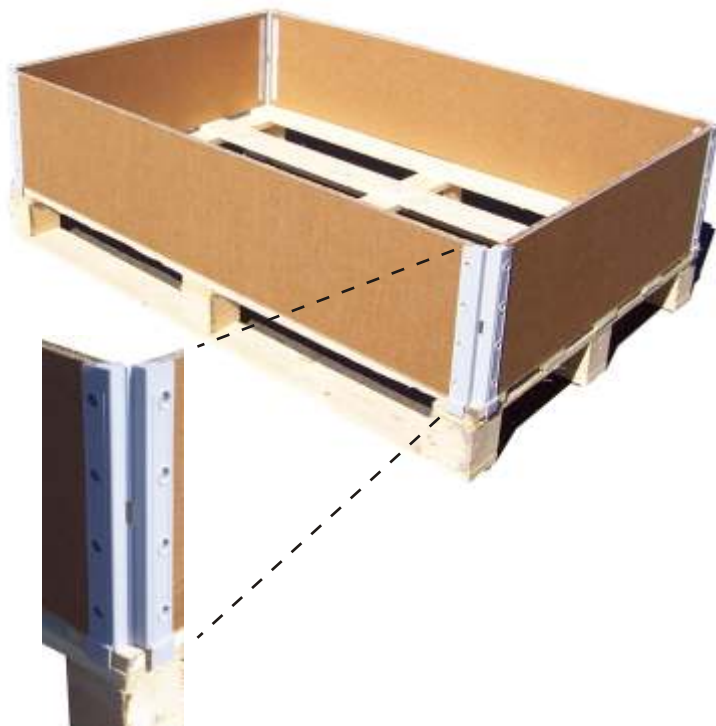

The sides of Ekopallkragen are made of 15mm thick special cardboard, a pure natural product that is recycled. The hinges of Ekopallkragen are molded in one piece of PP plastic.

The unique combination of plastic hinges and cardboard are a new patented invention, and all suppliers that today uses cartons and other packaging can now use Ekopallkragen instead to make environmental savings. The Ekopallkragen can also be reused, which of course increases the environmental savings even more.

ekopallkragen HAS A LOW WEIGHT

The Ekopallkragen weighs less than 2,5 kg - about 5 kg less than a wooden pallet collar. This means considerable lower transport costs, especially at airfreights.

The low weight also saves the person's backs and necks. A common problem with the wooden pallet collars are the squeeze injuries, which is not the case with Ekopallkragen.

- advantages that brings solutions -

the solution to ISPM15-
the new restrictions for import/export

ekopallkragen IS EASY TO PROFILE

Logotype and other marketing messages are easily applied on the sides of Ekopallkragen with decals or screenprint. This is of big importance today, as the goods more and more often are sold directly from the pallets in the shops.

ekopallkragen IS 25% BIGGER

The standard size is 800x1200 mm (full pallet) and 600x800mm (half pallet), both 250 mm high. The size of Ekopallkragen can also be adjusted to special needs, even in smaller series.

ekopallkragen IS EXPORT SAFE

The Ekopallkragen solves the problem with the new restrictions for import/export - ISPM15 (International Standard for Phytosanitary Measures, for more info go to www.ippc.int).

ekopallkragen IS CHEAPER

The Ekopallkragen gives great economic savings compared to the earlier wooden pallet, both through lower buying price, the possibility to leave out cartons and other packaging, the fact that it is reusable and, of course, the lower freight costs.

ekopallkragen

-THE LIGHTER OPTION

ekopallkragen IS EASY DELIVERED

Ekopallkragen comes with 99 pcs on a compact loaded pallet, plasted and taped for safe handling.
